

Artasam Bin Rashid

AI/ML Engineer

✉ artasambinrashid@gmail.com ☎ +92 3322357593 in LinkedIn 📁 Portfolio 📍 Islamabad, Pakistan

Summary

- Results-oriented AI/ML Engineer with hands-on expertise in designing and deploying end-to-end machine learning pipelines, autonomous agentic AI systems, and production-ready applications. Proficient in the full MLOps lifecycle — from data ingestion and feature engineering to model training, SHAP-based explainability, CI/CD automation, and cloud deployment via Streamlit and GitHub Actions. Experienced with Large Language Models (LLMs), LangChain, LangGraph, and Groq-powered inference for building reasoning-driven agents.

Work Experience

- **Data Science Intern — 10Pearls Pakistan (Remote)** Dec 2025 – Feb 2026
 - Architected a production-grade Air Quality Index (AQI) prediction system using real-time Open-Meteo API data, engineering time-based, rolling-statistics, and lag features across a serverless stack.
 - Trained and evaluated three ML models (Random Forest, LightGBM, XGBoost) with RMSE, MAE, and R^2 metrics; integrated Hopsworks Feature Store for automated feature versioning and model registry management.
 - Implemented GitHub Actions CI/CD pipelines: hourly feature ingestion and daily model-retraining workflows, delivering a fully automated, self-improving forecasting system with zero manual intervention.
- **AI/ML Intern — DAM TECHHUB (Remote)** July 2025 – September 2025
 - Built an AI-powered Resume Analyser that classifies resumes into job categories using a Logistic Regression model trained on TF-IDF features, achieving accurate multi-class category prediction.
 - Integrated Hugging Face Sentence-Transformer embeddings (S-BERT) to compute cosine semantic similarity between resumes and job descriptions, enabling precise candidate-job matching beyond keyword overlap.
 - Extended the platform with ATS simulation across 6 platforms (Taleo, Workday, Greenhouse, iCIMS, Lever, Generic) and an AI bullet-polish feature powered by Groq LLM (Llama 3.3 70B) for achievement-focused resume rewriting.
- **GenAI Data Analytics Program Participant — Tata Group (Forage)** July 2025 – April 2026
 - Executed end-to-end data analytics workflows using Generative AI for financial risk assessment.
 - Conducted exploratory data analysis (EDA) and built risk profiling models for customer segmentation.
 - Applied machine learning techniques to predict delinquency and optimize decision-making.
 - Delivered data-driven business insights through reports and storytelling for collections strategy.
 - Designed an AI-powered collections framework to improve operational efficiency and recovery rates.

Education

- BSc Artificial Intelligence** (NUML), Islamabad Feb 2022 - Jan 2026
- Relevant Coursework: NLP, Computer Vision, Machine Learning, Deep Learning
 - GPA: 3.35/4.00

Projects

- **Search Engine Agent — AI Research Assistant with YouTube Learning Mode** 📁

Engineered a multi-source AI research agent using LangGraph's ReAct loop querying DuckDuckGo, Wikipedia, and Arxiv, with 4 Groq LLMs featuring dynamic model switching and per-model TPM budgets; built a YouTube Learning Mode with 5-strategy transcript extraction, AI-generated summaries, and video QA chat with conversation memory, alongside session analytics, JSON/Markdown export, and a dark neon glassmorphism UI.

- **LinkedIn Post Automation Agent — Production Multi-Agent AI Pipeline** 
Architected a 7-node LangGraph StateGraph pipeline autonomously generating and publishing daily LinkedIn posts via GitHub Actions, powered by a 6-source news aggregator with 38-keyword relevance scoring, anti-repetition deduplication, 7-format rotating post structures, a 2-tier safety pipeline, and a Pexels → Unsplash → SVG image waterfall with full LinkedIn REST API v2 integration.
- **Final Year Project — AI Virtual Try-On System**
Developed a deep learning-based virtual try-on system by fine-tuning Stable Diffusion Inpainting (stable-diffusion-v1-5) with human pose estimation, body segmentation, geometric garment warping, and generative image synthesis — enabling photorealistic, pose-diverse garment overlays with preserved texture fidelity and spatial alignment for online fashion e-commerce.
- **Phishing-and-DDoS-Detection-System** 
Designed a hybrid AI cybersecurity detection system using LangGraph StateFlow orchestrating a phishing pipeline (VirusTotal URL scanning, attachment heuristics, keyword rule engine, and LLM verdict) alongside a DDoS detection pipeline extracting HTTP traffic features with rule-based thresholds confirmed by a Groq LLM SOC analyst, delivered via a Streamlit glassmorphism dashboard with dedicated Phishing and DDoS tabs.
- **Air Quality Index Prediction System (Rawalpindi)** 
Engineered a fully serverless end-to-end ML pipeline forecasting AQI for 72 hours using Open-Meteo real-time data, benchmarking Random Forest, LightGBM, and XGBoost (evaluated on RMSE, MAE, R^2) with automated best-model registration to Hopsworks, cyclical encodings, lag features, and SHAP explainability — fully automated via GitHub Actions hourly and daily workflows with real-time hazard alerts and safety recommendations.
- **AI-Powered Resume-Analyzer** 
Developed a full-stack resume intelligence platform with PDF/DOCX/TXT parsing, spaCy NER, 100+ skill detection, and Logistic Regression + TF-IDF job category prediction, featuring a 5-dimension match scoring engine combining TF-IDF cosine similarity and Sentence Transformer semantics, a full ATS Simulation Engine auditing against 6 platforms with severity-ranked feedback, an AI Bullet Polish rewriter, and a centralised Groq API client with retry and rate-limit handling.

Technical Skills

- **Languages & Tools:** Python, SQL, TensorFlow, PyTorch, Scikit-Learn, Streamlit, FlaskAPI, MLflow, Git, GitHub Actions, Docker
- **Technical Skills:** Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI (LLMs, LangChain, Prompt Engineering), Model Deployment, Data Preprocessing
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

Certificates & Badges

- AI Productivity App
- Data Analysis using PartyRock
- AWS AI Practitioner Challenge
- Langchain For LLM Applications by DeepLearning.ai
- Computer Operator certificate by National Institute of Electronics (NIE)
